My current roles

Software Developer at Greelab

Dhaka, Bangladesh | Since January 2021

(Self Employed) (Remote)

- Rapid prototyping internal workflow improvement tools for remote collaboration among contributors.
- Build interactive prototypes from Figma design.
- Progressive web application with Responsive UI and User-friendly UX.
- Website optimization plus Fast reload and SEO.
- Database architecture and API integration.
- Deployment with Firebase hosting and Version control with GitHub

Fullstack Developer at Freelance Marketplace

Dhaka, Bangladesh | Since December 2020

(Self Employed) (Remote)

- Worked closely with user groups, design teams, product managers, and business analysts to create intuitive and easy-to-use software, and translated project requirements and business objectives into technical product specifications.
- Devised site maps and mock-ups for designs based on end-user feedback.
- Recommended design changes and iterative updates to the IT manager.
- Designed UIs within front-end web frameworks, utilizing associated templates and tools to shorten development times.

Software Quality Assurance at 6sense Technologies Ltd.

Dhaka, Bangladesh | Mar 2020 - Dec 2020   (Permanent) (Part Time) (Remote)

- Coordinated with software developers and users to check the sustainability of applications to address user needs and achieve business goals.
- Reviewed technology stack regularly to continue improvements for maintaining consistent development outcomes.
- Managed deployments of applications from milestone to implementation.
- Managed and prioritized sprint backlog and delivery cycles.
- Managed updates of new features by road-mapping deliverables and technical analysis of how, where, and when each component could integrate.

Junior Software Developer at 6sense Technologies Ltd.

Dhaka, Bangladesh | Sep 2019 - Dec 2020   (Permanent) (Part Time) (Onsite)

- Developed user story and prototypes for quality assurance and design team.
- Developed and maintained a minimum viable product for digital marketing to define brand across web and mobile platforms.
- Followed through and merged down team design vision by conducting research and reconnaissance.
- Supported visual development, content structuring and timeline for campaigns.
- Executed team strategy and completed projects under deadlines within cost-efficient procurement.
